KRISTALLO SERIES DOOR STATIONS

KRISTALLO KR-AV SERIES

KR-AV-W

KR-AV-B

KR-AV-VR

**KR-AV-VR
+ KR-AV-VR-SB**

Kristallo®

Surface or flush Kristallo series door stations

The KR-AV are a range of 1 button video door panels for the VX2200 system. Available in vandal resistant 12 gauge 316 grade stainless steel (surface or flush) or flush mounting (internal use only) Kristallo style panels.

The vandal resistant variant is available both flush and surface mount and include a colour camera and call button. The Kristallo style panels are available in a white or black satin smooth finish with touch controls for the call button, coded access and an auxiliary relay (for example to switch on a light) and include a colour camera with illumination.
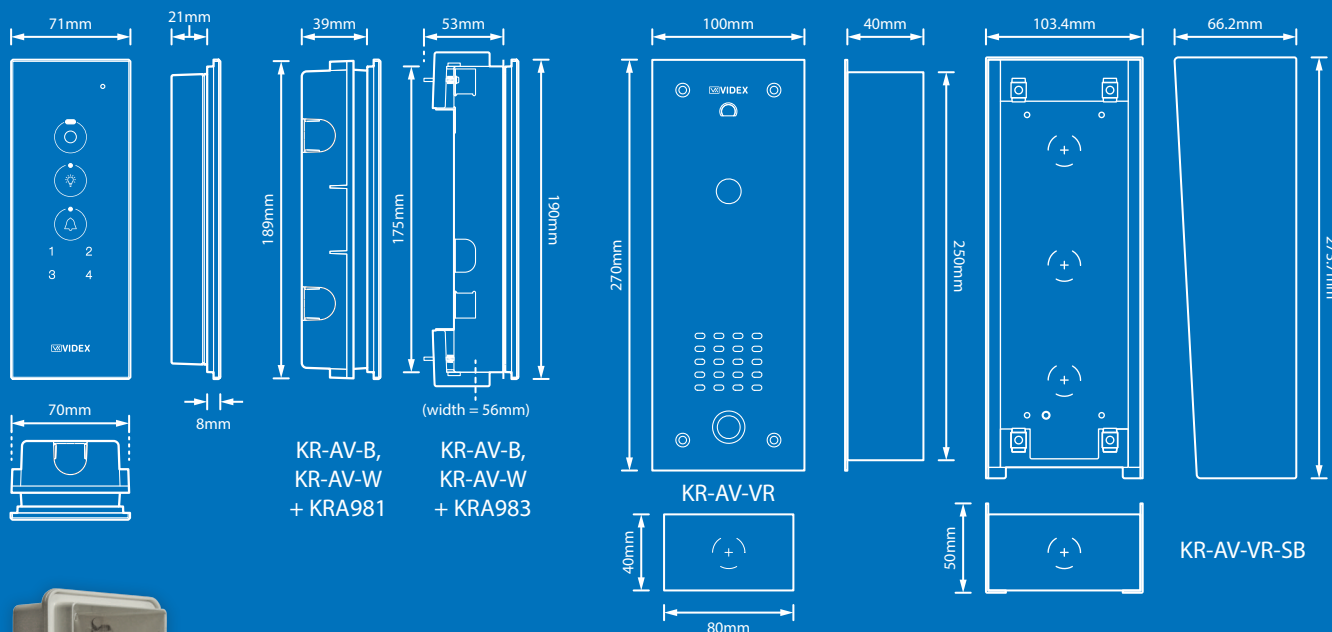

These panels can be used standalone or as part of a larger system with communal entrances where there is a need to also have a video intercom at each apartment entrance for additional security. In the case of the Kristallo style units (KR-AV-W and KR-AV-B) the tenants can also use the entry panel to gain access using an access code which can be entered on the 4 button keypad.
